PRIVATE OPERATING SHEET

Interview-Day Run Sheet

A one-page cue sheet for readiness, answer order, retrieval, and recovery. Copy verified logistics and your own truthful story labels into private notes before interview day; never store passwords here.

OPERATING RULE

One round at a time. Listen, establish the new contract, make the next useful decision, and close with evidence. A prior answer is a note for later - not the starting state of the next round.

READINESS BY HORIZON

24 hours before	60 minutes before	10 minutes before
Confirm date, timezone, format, contact path, access needs, quiet-space or travel plan, sleep, meal, and permitted materials.	Test power, network, backup, camera, microphone, browser, editor, allowed tools, meeting link, lighting, water, and interruption plan.	Close notifications and updates; reset posture; open the correct link; review only cues; do not start a new problem or full rehearsal.

ANSWER CUES - SAY THE DECISION ORDER, NOT A MEMORIZED SCRIPT

Round	Decision order	Minimum close
Coding	Contract -> examples -> approach -> invariant -> implement -> boundary tests	Complexity, remaining check, and what you would verify with more time
System design	Users and guarantees -> scale -> source of truth -> flow -> failure -> trade-off	Metric, accepted cost, open assumption, and reversal condition
Behavioral	Question -> context -> my decision -> alternative -> action -> evidence -> learning	Measured result, honest limit, and what changed afterward
Story retrieval	Decision label -> competing constraint -> stakeholder -> changed commitment -> outcome	Use three cue labels only; keep full scripts out of view

THREE-MINUTE BETWEEN-ROUND RESET

01 - Release	02 - Recover	03 - Reopen
Write one factual moment from the prior round. No score, verdict, or replay.	Use one slow breath, posture, water, and an immediate logistics check.	Name one question and one adjustment for the next round's new contract.

RECOVERY LANGUAGE

Moment	Useful sentence
Prompt is unclear	Before I choose an approach, may I confirm the input, success condition, and most important constraint?
You are stuck	I will restate the contract, test the smallest case, and name the correct baseline before optimizing.
Connection fails	I am reconnecting through my tested backup now. If we disconnect again, I will use the agreed contact path.
Prior round felt weak	That round is closed. I have one note for later; I will start this round from its own contract.

CARRY, ASK, AND PROTECT

Private retrieval cues	Questions and close	Privacy and ethics
Carry one target sentence, three truthful story labels with decision and outcome, one coding invariant cue, one design failure cue, and one remaining risk.	Ask what this person should own in six months and which boundary creates recurring work. Thank the interviewers; save factual notes after the loop.	Use only your notes and authorized material. Exclude leaked prompts, confidential data, credentials, private personal data, and recordings without consent.

AFTER THE LOOP - FACTS BEFORE INTERPRETATION

Capture now	Close safely	Review later
Record the date, round type, interviewer names and roles as provided, question themes, commitments, interruptions, and exact facts you can still distinguish from interpretation.	Send only promised follow-ups through the approved channel. Close recordings and confidential material, preserve permitted notes securely, and remove data you are not authorized to keep.	After recovery, compare evidence with the rubric: what decision was clear, which probe exposed a gap, and one behavior to test next. Do not invent a score or rewrite history from emotion.

CLOSE RULE

Capture facts, complete promised actions, and step away. A calm evidence review later is more useful than an immediate verdict about how the interview went.
