BEHAVIORAL

50 Behavioral Questions

CORE IDEA

A practical worksheet for 50 behavioral questions using evidence-first STAR structure.

Answer structure

+ Headline
+ Situation and constraint
+ Your decision
+ Actions and communication
+ Result and evidence
+ Learning and later reuse

Reviewer questions

+ Is the candidate's action visible?
+ Is the company/title context translated?
+ Is the result supported without invented precision?
+ Does the example match the target seniority?

Question bank

50 Behavioral Questions

#	Practice prompt
1	Tell me about a technically difficult decision you made with incomplete information. Follow-up angle 2: clarify your exact decision, evidence, and result.
2	Describe a conflict where you changed your position after new evidence. Follow-up angle 3: clarify your exact decision, evidence, and result.
3	Tell me about a failure that changed a durable engineering practice. Follow-up angle 4: clarify your exact decision, evidence, and result.
4	Describe a time you improved an outcome without formal authority. Follow-up angle 5: clarify your exact decision, evidence, and result.
5	Tell me about a customer or internal-user problem you initially misunderstood. Follow-up angle 1: clarify your exact decision, evidence, and result.
6	Describe an ambiguous project and how you created alignment. Follow-up angle 2: clarify your exact decision, evidence, and result.
7	Tell me about a tradeoff between speed and quality. Follow-up angle 3: clarify your exact decision, evidence, and result.
8	Describe a time you raised a risk others did not yet see. Follow-up angle 4: clarify your exact decision, evidence, and result.
9	Tell me about a project you simplified or stopped. Follow-up angle 5: clarify your exact decision, evidence, and result.
10	Describe how you handled a remote communication breakdown. Follow-up angle 1: clarify your exact decision, evidence, and result.
11	Tell me about a technically difficult decision you made with incomplete information. Follow-up angle 2: clarify your exact decision, evidence, and result.
12	Describe a conflict where you changed your position after new evidence. Follow-up angle 3: clarify your exact decision, evidence, and result.
13	Tell me about a failure that changed a durable engineering practice. Follow-up angle 4: clarify your exact decision, evidence, and result.
