COMPANY

Walmart Global Tech Interview Question Bank

CORE IDEA

Practice bank for Walmart Global Tech, calibrated to global retail technology and the published signals available for review.

Public-context emphasis

+ commerce scale
+ supply chain
+ operational reliability

How to use this bank

+ Treat prompts as original practice
+ Do not expect exact repeats
+ Calibrate to role and level
+ Verify current process with recruiter

EVIDENCE BOUNDARY

No observed-frequency claim is made unless a named reviewer verifies it in the source ledger.

Question bank

Walmart Global Tech Interview Question Bank

#	Area	Priority	Original practice prompt
1	DSA	Core	Design an algorithm to identify the top-k rapidly changing signals in a global retail technology workload.
2	DSA	Core	Given a stream of events from global retail technology, detect duplicate or out-of-order records within a bounded window.
3	DSA	Supporting	Model dependencies between services or jobs and return a valid execution order or explain why none exists.
4	DSA	Supporting	Find the shortest transformation or routing path in a graph representing a global retail technology product.
5	DSA	Supporting	Merge overlapping time ranges and explain boundary behavior for scheduling or availability data.
6	DSA	Supporting	Build a prefix or trie-based lookup suitable for user-facing search or configuration keys.
7	System design	Core	Design a multi-region service for global retail technology; state consistency and failover behavior.
8	System design	Core	Design an event ingestion pipeline for global retail technology with retries, deduplication, and replay.
9	System design	Supporting	Design a rate-limiting and abuse-control layer for a public API in global retail technology.
10	System design	Supporting	Design a low-latency read path with caching; explain invalidation and hot-key handling.
11	System design	Supporting	Design an audit-ready state change workflow where partial failure cannot silently lose an update.
12	System design	Supporting	Choose a partition key and migration plan for a rapidly growing global retail technology dataset.
13	Behavioral	Core	Tell me about a time you demonstrated commerce scale under an ambiguous constraint.
14	Behavioral	Core	Describe a decision where supply chain conflicted with delivery speed. What evidence guided you?
15	Behavioral	Supporting	Give an example of improving operational reliability after an incident, customer problem, or failed launch.
16	Behavioral	Supporting	Tell me about a disagreement with a senior stakeholder. How did you represent the other view and reach a decision?
17	Behavioral	Supporting	Describe a project whose result was weaker than expected. What did you change in your operating approach?
18	Behavioral	Supporting	Explain a cross-team outcome you influenced without direct authority, including the mechanism that lasted afterward.

Company emphasis and source ledger

Evidence gate

Domain context

+ global retail technology

Interview signals to verify

+ commerce scale
+ supply chain
+ operational reliability

Source ledger

Candidate calibration

- [ ] Confirm role family and seniority
- [ ] Ask recruiter for the current interview loop
- [ ] Practice clean code and tests
- [ ] Prepare two domain-relevant system designs
- [ ] Map eight evidence-rich behavioral stories
- [ ] Do not memorize unverifiable leaked questions

PUBLISHING STATUS

REVIEW GATE: PUBLIC SOURCE SUFFICIENCY. AI-produced draft. A named human must verify technical accuracy, sourcing, freshness, and editorial quality before publication. Reviewed-through date: 2026-07-18.
