COMPANY / RAZORPAY

COMPANY

Razorpay Interview Question Bank

CORE IDEA

Practice bank for Razorpay, calibrated to Indian payments infrastructure and the published signals available for review.

Public-context emphasis

+ transaction correctness
+ API design
+ risk

How to use this bank

+ Treat prompts as original practice
+ Do not expect exact repeats
+ Calibrate to role and level
+ Verify current process with recruiter

EVIDENCE BOUNDARY

No observed-frequency claim is made unless a named reviewer verifies it in the source ledger.

Question bank

Razorpay Interview Question Bank

#	Area	Priority	Original practice prompt
1	DSA	Core	Design an algorithm to identify the top-k rapidly changing signals in a Indian payments infrastructure workload.
2	DSA	Core	Given a stream of events from Indian payments infrastructure, detect duplicate or out-of-order records within a bounded window.
3	DSA	Supporting	Model dependencies between services or jobs and return a valid execution order or explain why none exists.
4	DSA	Supporting	Find the shortest transformation or routing path in a graph representing a Indian payments infrastructure product.
5	DSA	Supporting	Merge overlapping time ranges and explain boundary behavior for scheduling or availability data.
6	DSA	Supporting	Build a prefix or trie-based lookup suitable for user-facing search or configuration keys.
7	System design	Core	Design a multi-region service for Indian payments infrastructure; state consistency and failover behavior.
8	System design	Core	Design an event ingestion pipeline for Indian payments infrastructure with retries, deduplication, and replay.
9	System design	Supporting	Design a rate-limiting and abuse-control layer for a public API in Indian payments infrastructure.
10	System design	Supporting	Design a low-latency read path with caching; explain invalidation and hot-key handling.
11	System design	Supporting	Design an audit-ready state change workflow where partial failure cannot silently lose an update.
12	System design	Supporting	Choose a partition key and migration plan for a rapidly growing Indian payments infrastructure dataset.
13	Behavioral	Core	Tell me about a time you demonstrated transaction correctness under an ambiguous constraint.
14	Behavioral	Core	Describe a decision where API design conflicted with delivery speed. What evidence guided you?
15	Behavioral	Supporting	Give an example of improving risk after an incident, customer problem, or failed launch.
16	Behavioral	Supporting	Tell me about a disagreement with a senior stakeholder. How did you represent the other view and reach a decision?
17	Behavioral	Supporting	Describe a project whose result was weaker than expected. What did you change in your operating approach?
18	Behavioral	Supporting	Explain a cross-team outcome you influenced without direct authority, including the mechanism that lasted afterward.

Company emphasis and source ledger

Evidence gate

Domain context

+ Indian payments infrastructure

Interview signals to verify

+ transaction correctness
+ API design
+ risk

Source ledger

Candidate calibration

- [ ] Confirm role family and seniority
- [ ] Ask recruiter for the current interview loop
- [ ] Practice clean code and tests
- [ ] Prepare two domain-relevant system designs
- [ ] Map eight evidence-rich behavioral stories
- [ ] Do not memorize unverifiable leaked questions
